### Battery-free equipment monitoring

The AZN3200 is a wireless battery-free temperature sensor. This flexible sensor is designed to monitor environmental and material temperatures in a wide range of settings. Typical applications include environmental temperature monitoring, bulk material temperature monitoring, data center chiller and cooling monitoring, as well as cold chain monitoring at key shipment centers.

### Wireless temperature sensing

The AZN3200 has a standard operating temperature range of -40 °C to +85 °C. This covers the nominal operating temperatures of most equipment and environmental operating conditions.

### Flexible easy to install design

The AZN3200 is built using flexible materials with a built-in adhesive strip. The AZN3200 incorporates an integrated RF antenna to harvest energy for the temperature sensing function, as well as to communicate with a RAIN/UHF compliant reader. The integrated antenna is configured to be relatively insensitive to moisture and rain but is not suitable for direct use on metal.

### Compliance

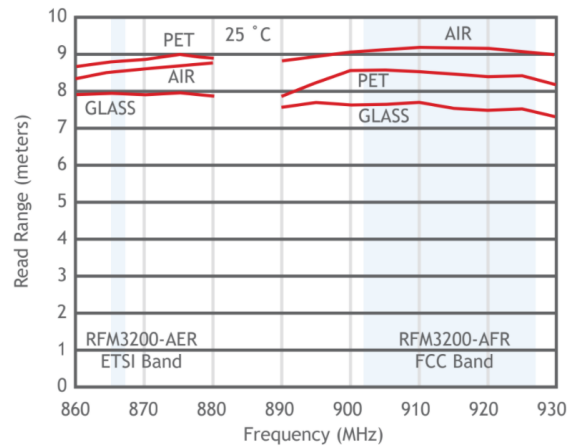

The AZN3200 is available in FCC and EU/ETSI frequency ranges. The AZN3200 requires a RAIN/UHF compliant reader. These sensors can be purchased separately or as part of a kit.
