

Features

- Compact design
- Low axial ration for optimum performance
- Read range*: up to 12 m (* depending on tag properties, environment and requirements)
- Optimised for portal applications
- Suitable for use in industrial environments
- High degree of protection, IP67 suitable for outdoor use

For classic far field applications with large reading distances, the Wide Range Antennas (WRA) are the optimal choice: they are characterised by a very low axial ratio for circular polarization, whereby the dependence of reading results upon the position or alignment of tags is significantly reduced. For this reason they are also the ideal solution for portal applications in addition to many other application possibilities.

General Specifications

Key Applications

- Gate applications for goods registration
- Logistics
- Vehicle registration
- Bulk and single-tag applications

Mounting

NOTICE

Risk of damage to property!

- ► Make sure that the screw is only screwed in max. 10 mm deep into the housing (M_{max} = 5 Nm).
- Four M6 drill holes at intervals of 100 x 100 mm

Accessories (Optional)

You can find all accessories at http://www.kathrein-solutions.com/products/hardware/accessories.
